Cancer Action Plan is a new generation of cancer therapy information and should be the First Port of Call for any person (or relative or friend of a person) suffering with cancer. Within Cancer Action Plan the authors present information about a wide selection of the most important unconventional cancer therapies, including treatments that can be carried out from home and/or their local area as well as treatments provided by specialist unconventional cancer clinics around the world. Details of how to carry out relevant therapies and full costings are provided. In addition, Cancer Action Plan includes informative and easy to read interviews with the innovators of the most promising unconventional cancer therapies as well as an interview with the world’s most foremost cancer treatment investigator, Ralph Moss. The interviews enable the reader to hear direct from doctors and researchers who have treated 10,000’s of individuals using their particular approach. Because of the growing controversy surrounding chemotherapy, one section of Cancer Action Plan provides details of a recently available test that can indicate in advance whether or not chemotherapy is likely to work for an individual and if it is what combination of chemotherapeutic agents are indicated. Also, other important facts about chemotherapy which the reader should be aware of are clearly discussed. The information Cancer Action Plan provides is essential reading for anyone impacted by cancer. The information is structured in a new and unique way, making it easy to read and the information useful and useable. Responsible, well researched and clearly written, Cancer Action Plan is urgent, vital reading for everyone concerned about cancer.

Cancer’s Best Medicine A Self-help and Wellness Guide, Mauris L. Emeka, Jan 1, 2004, Cancer, 48 pages. More than one-hundred years ago researchers discovered that cancer is not a tumor; instead, cancer is the PROCESS that causes a tumor -- and removing the tumor does not remove.
